

Quality Policy

ISO 9001:2015

Air Restore Pty Ltd

Air Restore is committed to providing the very best quality clean air services in a creative and innovative manner. To ensure this goal is achieved in a legal and efficient manner, we have established a quality program to provide our clients with the assurance that the services provided by the Company will meet current and future customer requirements.

Through a system of review of our operations with our key stakeholders, we continuously monitor all levels and inputs into our organisation to achieve improvements wherever possible. Our vision is to be a leader in clean air, offering sound and effective quality products and services to our expanding customer base.

Above all, we deal openly with our clients, colleagues and suppliers to make sure that we begin and maintain honest, open and positive relationships. We recognize that these relationships are dynamic and need constant care and management to ensure a steady continuance in the development & success of Air Restore.

This program includes a quality management system based upon ISO 9001: 2015 as well as other standards as required by our organization to meet our stakeholder's needs and expectations.

In pursuing our quality goals and objectives, an Air Restore has adopted the following approach:

- ❑ To provide our team with appropriate training and development, empowering them to realise their full potential & pass this on to our customers in a helpful and competent manor.
- ❑ To ensure the highest quality of technology & service, which is continually upgraded
- ❑ Commitment to the achievement of higher standards of customer satisfaction consistent with professional standards and ethics as defined by the professional bodies associated with Indoor Air Quality.
- ❑ To adopt an approach in the pursuit of all quality objectives to achieve and maintain the highest level of quality.
- ❑ To provide Indoor Air Quality Restoration of Heating, Ventilation and Air conditioning systems to the applicable standards
